

Green Coffee Inventory Template

BrewedLate — free printable green coffee stock sheet for home roasters

Field reference (with worked example)

Log each bag when it arrives; update Remaining (g) after every roast session.

Field	Example	Why it matters
Name	Ethiopia Guji Grade 1	Human label you search and sort by
Origin	Ethiopia	Country drives profile family and expectations
Region	Guji	Narrows altitude/process norms for planning
Process	Natural	Biggest lever for heat/fan profile choice
Variety	Heirloom	Flavor potential and density clues
Altitude (m)	1700-2200	Density proxy; pairs with profile altitude packs
Grade	Grade 1	Defect/sieve signal when comparing lots
Supplier	Green Bean Roasters	Reorder path and lot consistency
Weight (g)	1000	Starting bag size for stock math
Remaining (g)	760	What you can still roast this week
Target roast level	2.0 / medium	Where you want this bean to land
Notes	Berry-forward; try F-NAT first	Cupping cues and first-pass profile ideas

Blank inventory log

Print and fill by hand — one row per bag or lot.

[illegible]

Name	Origin	Region	Process	Variety	Altitude (m)	Grade	Supplier	Weight (g)	Remaining (g)	Target roast level	Notes
